## Providing Comprehensive Representation to the Semiconductor Industry

Attorneys at VLP have years of experience representing companies in the semiconductor industry, including semiconductor wafer foundries, fabless design houses, IDM's and others in the semiconductor manufacturing sector. We work with semiconductor companies at all stages of development, from technology start-ups to mature corporations. Using a multi-disciplinary approach, we leverage the knowledge and skills of attorneys in a wide range of practice areas, including corporate, intellectual property, and technology transactions, to tackle the diverse challenges of these complex and growing businesses.

Companies throughout the industry rely upon VLP to provide comprehensive legal representation in a broad range of legal matters, including advising on:

- ➔ Foundry agreements.
- ➔ Design services agreements.
- ➔ Intellectual property issues.
- ➔ Financing.
- ➔ Commercial transactions.
- ➔ Tax.
- ➔ Securities and capital raising.

VLP attorneys have longstanding experience in the sector and bring their broad knowledge of the industry to bear for our clients. Regardless of what the issue may be, we offer a team of sophisticated attorneys focused on developing legal strategies that are fully aligned with our semiconductor clients' business needs and operations.

At VLP we believe in building strong partnerships with companies working across the semiconductor industry. We take the time to develop a complete understanding of our clients' businesses and technologies so that we can help them reach their current and future business goals. Our attorneys also monitor national and international legal changes and trends to make certain that we have the most up-

to-date information about important developments impacting the industry and our clients.
