

VLP Partner Michael Whitener Interviewed by Inside Counsel in the Article “Top Cybersecurity Innovations of 2017”

VLP Partner Michael Whitener sat down with *Inside Counsel* magazine to discuss the “Top Cybersecurity Innovations of 2017” and how they will affect the future of the industry.

The article noted that it can be easy to lose sight of the innovation in the cybersecurity industry amidst the frequent news about breaches and increasingly sophisticated hackers. But among all the chaos, there are many promising innovations gaining traction that could change the way enterprises conduct business.

Mr. Whitener addressed questions about three key cybersecurity developments: blockchain, cloud security, and machine learning/artificial intelligence (AI).
